## Infrared radiator for IR warming cabins with built-in dimmer

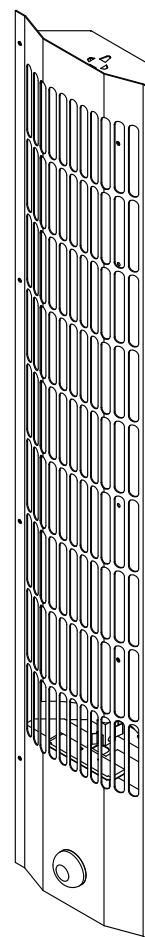

Full spectre IR radiator with high-performance quartz glass emitter and built-in dimmer. Completely with durable housing, protective grill and pre-mounted cable. For domestic and commercial use.

### Your advantages:

- Full, high intensity power output in less than a second
- Full spectre infrared radiation - IR-A, IR-B and IR-C
- Built-in dimmer for quick and easy heat adjustment
- Available in 3 power outputs: 350 W, 500 W, 750 W
- Completely pre-mounted with durable stainless steel housing, polished aluminium reflector and protective grill
- Integrated inrush current limiter
- Including 3 m silicone cable
- Made in Germany quality by EOS

### Features and specifications:

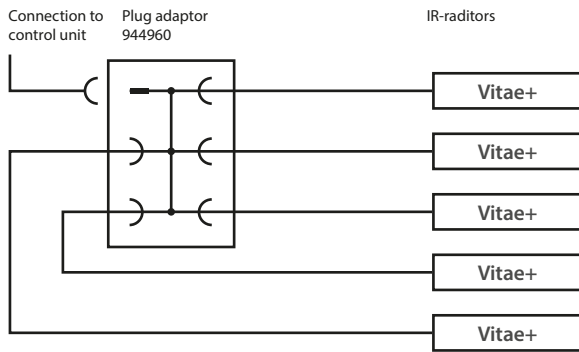

Housing:	Stainless steel
Reflector:	Polished aluminium
Cover:	Protective grill, aluminium, with black flocking
Dimming:	Built-in dimmer with on/off function
Connection cable:	Silicone cable 3x1,5 mm <sup>2</sup> , approx. 3 m, with Wieland type plug
Dimensions (HxWxD):	990 x 185 x 65 mm
Power output:	350 W, 500 W, 750 W
Power supply:	230V 1N AC 50 Hz
Installation:	In the cabin side walls or corners, vertically or horizontally. No ceiling installation permitted!

MADE IN GERMANY

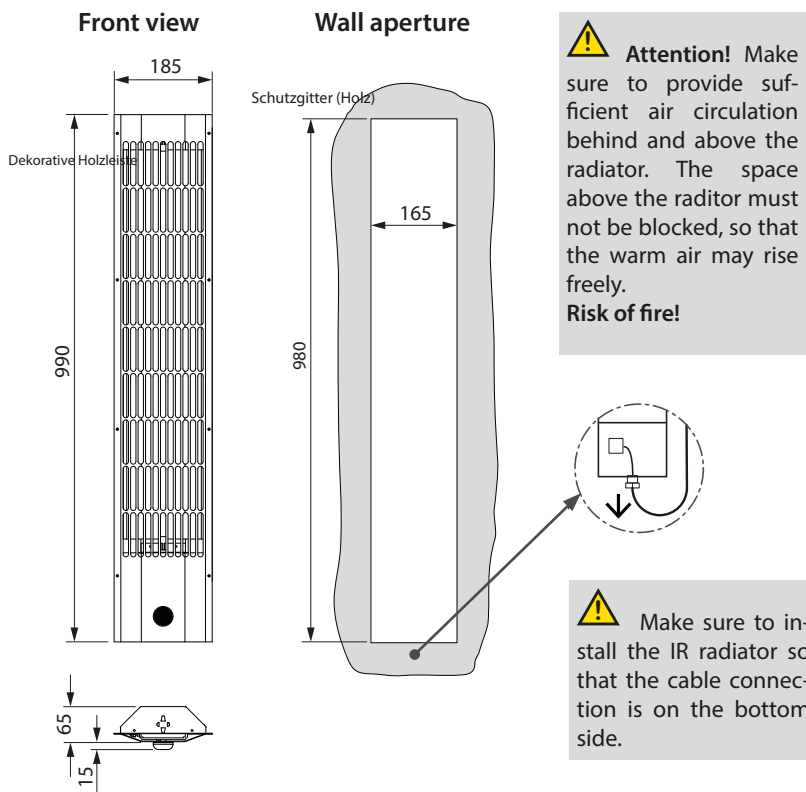

### Connection overview

By 750 W radiators max. 4 units (3500W) possible by 16 A capable connection line.

### Installation

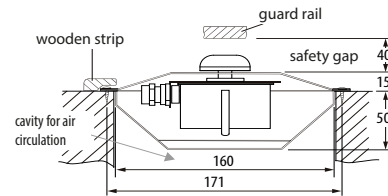

### Technical specifications
